Human security in the Asia Pacific: Perspective of food and health security

Author(s): Liu FK Year: 2009

Journal: Asia Pacific Journal of Clinical Nutrition. 18 (4): 669-673

Abstract:

As combined new factors could further complicate the food supply and health security for regional countries, new perspective on human security should be prioritized on securing health security in the region. In recent years, food production and supply has been affected by unpredictable climate change and unaccountable manmade factors in the region. With increased pressure from food security issues, personal health and human security is badly affected. It poses a threat to human security and becomes a concern of all states. In the new era, the pressing reality for all countries is that there is no exception for anyone before a pandemic. Threats to human security become not only a national security issue but also a transnational challenge.

Resource Description

Communication: M

resource focus on research or methods on how to communicate or frame issues on climate change; surveys of attitudes, knowledge, beliefs about climate change

A focus of content

Communication Audience: M

audience to whom the resource is directed

Policymaker

Exposure: M

weather or climate related pathway by which climate change affects health

Food/Water Security

Geographic Feature: M

resource focuses on specific type of geography

None or Unspecified

Geographic Location:

resource focuses on specific location

Climate Change and Human Health Literature Portal

Non-United States

Non-United States: Asia

Asian Region/Country: Other Asian Region

Other Asian Region: Asia Pacific

Health Impact: M

specification of health effect or disease related to climate change exposure

Infectious Disease, Malnutrition/Undernutrition

Infectious Disease: Airborne Disease

Airborne Disease: Influenza

Population of Concern: A focus of content

Population of Concern: **☑**

populations at particular risk or vulnerability to climate change impacts

Low Socioeconomic Status

Resource Type: **№**

format or standard characteristic of resource

Review

Timescale: M

time period studied

Time Scale Unspecified
